

MOVING FORWARD

For those looking to adopt the mandates in 2016-17, here is a list that shows the birth year for that season. Again, please note that when determining the age group for a season, the year the competition ends should be used.

There is another very important component to understand about this chart. To avoid players aging out of an age group during a season, the new top age group for youth competitions is U19. This change aligns with the birth year standard and makes sure that players are not eliminated from participating during the second half of a season. In short, all the existing U18 leagues should become U19 in the 2016-17 season and this change should cascade down the age groups (Ex: U17 becomes U18, U16 becomes U17, etc.).

NEXT STEPS

If adopting in 2016-17, your next steps should be the following:

- Reference the chart above to determine age groups
- Based on your current highest age group of competition offered, you will need to add an additional age group above that to ensure that players of all ages have the ability to compete. This will ensure that players are playing under the correct age group (19 year olds not playing in U18 competitions) and that players will not miss a year of competition.
 - Ex: Current highest league is U18. Player born in December of 1999 will be 19 years of age during the 17/18 season and should register for U19
 - For those that currently have U19 competitions, that moves to U20, and the same applies for subsequent older ages

For those adopting in 2017-18, your next steps will be the same except they will take place a year later.

In addition to the video and FAQ, we have also created a chart that tracks the pathway of a player from the 2016-17 season to 2024-25. Since the Player Development Initiatives are rooted in individual player development, this chart may make it easier to see the pathway a player takes based on his or her birth year.

This chart is organized to demonstrate how players will progress when registering by birth year. It displays the exact same information as the “Birth Year and Season Matrix” found above. Again, please note that when determining the age group for a season, the year the competition ends should be used.

- Ex: 2017-18 = 2018 – U7 = 2011
